Projects

- **Visioned SportLens** *Aug 2025 - Nov 2025*
  BuildSchool 7.0
  - Conceptualized and designed SportLens, an AI-based player comparison platform that uses computer vision (YOLO) to analyze sport-specific skills rather than relying solely on traditional statistics
  - Proposed a weighted scoring system to objectively rank players by assigning different importance to individual skill components, enabling a more holistic and data-driven performance comparison

- **Multi-Frequency Bidirectional Digital Counter** *Jan 2026 - April 2026*
  Digital Systems Lab (EE2702)
  - Designed and implemented a programmable bidirectional digital counter using 74LS-series ICs, integrating multiplexers, adders, comparators, and timers to support variable counting frequencies and negative number representation.
  - Optimized hardware cost by engineering a persistence-of-vision multiplexed display system, driving multiple 7-segment displays with a single display driver IC through time-division switching.

Skills

- **Programming**: Python, C/C++
- **Tools**: MATLAB/Simulink, Arduino*, ESP32*
- **Interest Areas**: Signal Processing Techniques, Analog Systems & Image/Video Processing ** Elementary proficiency*

Key courses taken

- **Mathematics**: Linear Algebra & Multivariable Calculus
- **Core Electrical**: Digital Systems and Signal & Systems

Positions of Responsibility

- **Deputy Coordinator**, Finance Club, IIT Madras *Sept 2025 - Present*
  - Organized and executed '36 Wall Street, IIT Madras's flagship event aimed at promoting financial literacy among students.
  - Conducted Samruddhi, an outreach initiative engaging government school students in foundational financial literacy education.
